

THE PARASITES EAT FIRST

Send Them Packing and Live Vibrantly

By Ivan Anderson

Have you ever wondered why you can't lose weight, sleep, eliminate migraines, stop hurting, coughing, shaking, breaking out, feeling tired, hungover, heavy or depressed? Don't you just want to feel better?

Vibrant Health Can Be Yours

Thank you for taking the time to download and read this special report. I am going to disclose information that is known to only a few and that has never been shared so succinctly. My goal with this ebook is to help you understand how to feel your very best and to attain vibrant health.

You're probably familiar with this well known advice for maintaining and perhaps improving your health:

- Eat a balanced diet
- Drink plenty of water
- Get adequate amounts of rest
- Reduce your stress
- Exercise

While you may not hear this in conventional medicine, fungi, parasites and toxins are the main causes for health challenges and diseases.

~ Ivan Anderson

Even by taking these steps you may find that you just don't ever seem to feel better. Does this sound familiar? Your medical tests come back fine and doctors think that your symptoms are all in your head.

Now, if it can't be found by medical tests then what could it be?

Health Destroyers - Fungi, Parasites and Toxins

While you may not hear this in conventional medicine, fungi, parasites and toxins are the main causes for health challenges and diseases (imbalances). Fungi include candida, food mold and environmental mold. Parasites are worms, bacteria and viruses. Toxins are environmental poisons such as chemicals, pesticides, heavy metals, electromagnetic frequencies and pharmaceuticals.

As a direct result of having a toxic overload of fungi, parasites and toxins, our immune system may become overstimulated, leading to food allergies and sensitivities. These allergies and sensitivities later turn into health destroyers.

In Hulda Clark's book, "The Cure for All Diseases" she attests to the belief that you can overcome virtually all diseases if you eliminate parasites and toxins from your body. I reviewed her book on the [Healing Tree Blog here](#).

Fungi

Fungi can be found in many of the foods that you eat. The average person is unaware of food containing fungi and the effect that fungi have on your health. Below are some of the common fungi that I address in my practice.

Candida (Candida Albicans)

One of those most prevalent and overlooked imbalances that people have is candida overgrowth. Candida is yeast that resides in the intestines. Sugar feeds the yeast and it begins to spread all over the body. It can cause joint pain, brain fog, acne, headaches, and the dreaded vaginal yeast infection that many women experience, just to name a few.

Food Mold

Food mold is one of the hidden perils of improper preparation and storage of food. Your food is long spoiled if it ever becomes sour to the smell or taste. Also, there are some inherently moldy foods such as cured and smoked meats, cheese, peanuts and peanut butter. Among other things, food mold can cause brain fog, acne, eczema, joint pain and respiratory problems.

Environmental Mold

Humidity, water and moisture can cause environmental mold. You may suffer from respiratory allergies because of mold in your outside environment. Here, I am referring to environmental mold inside your home or place of employment. Usually this mold is caused by water seeping in from the foundation,

a water spill that has not been cleaned up appropriately or by environmental dampness. You may often detect a musty odor and just ignore it. Please don't ignore this sign. While removal can be expensive, the health challenges caused by this mold may become life threatening. From my work, I have found that it affects the lungs and respiratory system, as well as the heart and circulatory system. I call this mold the "secret killer."

A client of mine living in Pittsburgh called to tell me that the family dog was wheezing as if it had asthma. Her daughter was having problems waking up and getting moving in the mornings and just felt "crappy" all day. Her son was irritable, anxious and tired. Yes, this may sound like typical teenage behavior. However, I detected and eliminated mold in their bodies, including the dog! After opening one wall in the basement to search for mold, they had to open all the walls and proceed with removal because the mold was everywhere. While they did not like the additional family expense, they were appreciative that I identified the source of the mold and was able to help their family feel better.

Parasites

No one likes to think about parasites, but they're a reality. With consistent and proper attention, you can rid your body of them and feel better than ever. Here are the basics that you need to know about parasites such as worms, bacteria and viruses.

Worms

A parasitologist told me, (after questioning me to make sure I knew what I was talking about), "Tell your clients that the worms eat first. Lol"

Worms attack all of your organs and glands. Think about it; pets have heartworms, liver and lung flukes as well as tapeworms. We are mammals. Why would we not suffer from worms as well? We do! Worms are one of the primary causes of organ failure, in fact they are one of the root causes why organs deteriorate.

I believe that your organs don't just stop working. Something acts upon them, worms.

Bacteria & Viruses (Germs)

Bacteria and viruses are what are generally referred to as germs. They occur naturally in the environment and are a source of many illnesses affecting you from head to toe, inside and out. Some of the common words you may hear that are associated with germs are infection, cold, flu, inflammation and

deterioration. I feel that parasites like worms and germs are the two most destructive health destroyers out there. Kill these parasites and save your organs.

In my wellness practice, I have helped thousands of people reduce or eliminate their medications by killing the parasites and by eliminating the imbalances to their organs.

Toxins

Toxins are found in your food, water, air, cleaning and laundry products, cosmetics, commercial waste, paint, medication, vaccinations, toys, ink and clothing. They include chemicals, heavy metals, electromagnetic frequencies (EMFs) and pharmaceuticals. They may be ingested orally and via your skin. Toxins are everywhere and are unavoidable.

Chemicals

Chemicals are compounds or substances prepared artificially. The list of harmful chemicals includes cleaning solutions, herbicides, pesticides and commercial waste. While not all chemicals are known to be toxic, many of them are, especially if your body becomes overloaded with them. Many chemicals are known carcinogens and may cause damage to the brain, organs and glands.

Heavy Metals

Aluminum, mercury, lead, copper, cadmium and zinc are some of the most commonly known heavy metals. Heavy metals occur naturally in the earth and often show up in the air we breathe, food we eat and water we drink. They are also found in paint, cookware and many of your health and beauty products. The heavy metal mercury is often used by dentists to fill cavities. Some of the ailments that heavy metals may cause are cancer, Alzheimer's, hypertension, joint and body pain, skin tags, Parkinson's, hormonal problems, brain and nervous system disorders, cysts, tumors, insomnia, fatigue and an overall feeling of sickness.

Electromagnetic Frequencies(EMFs)

Here's an unlikely group of health destroyers that you would not normally think about. EMFs are all around you and are generated by laptops, tablets, cellphones, microwave ovens, x-rays, electrical outlets and fluorescent lights. They have been known to cause insomnia, headaches, joint pain allergies, fatigue, eye problems and epilepsy. EMFs disrupt your natural energy flow. We are electrical beings after all. EMFs also weaken your immune system and make it harder for you to fight off the fungi and parasites. You are then more susceptible to illness and disease.

Pharmaceuticals

You need your drugs! I repeat; you need your drugs, well at least until you eliminate the fungi, parasites and toxins and heal your organs, glands and blood. Your doctor will tell you when it is time to reduce and eliminate your medicine, based on your test results.

If I understand it correctly, the majority of diseases in animals have been resolved through nutrition alone. Hmmm, why can't this be done for humans?

Have you ever known your body to be deficient of drugs? What about the side effects? I invite you to be concerned about what drugs are doing to your organs and glands that are causing the side effects. Your body can talk! Symptoms are a sign of a more serious underlying problem. I wrote more about how your body talks and what you can learn from it on the [Healing Tree Wellness Center blog](#).

I HAVE ANSWERS!

Fortunately, I have a comprehensive approach to help increase your energy, eliminate your pain, improve your memory and help you feel 10 years younger.

We use our proprietary vibrational hair analysis to:

1. Identify and eliminate fungi, parasites and toxins
2. Restore balance to the organs and glands
3. Identify and eliminate food sensitivities
4. Help you become the healthiest person you know

Please call our office at 540-745-3030 and say “I want to rid my body of Parasites and Feel Better” or visit our website at www.healingtreehealth.com to get help now.

Become the Healthiest Person You Know!

Wishing you Vibrant Health, Ivan Anderson

Vibrational Hair Analysis

Getting answers can take years, numerous trips to doctors' offices and cost a lot of money. Fortunately, there is another way. My vibrational hair analysis is accurate, effective, safe and affordable.

Vibrational Hair Analysis is a method to test the energetic imbalances within your body. This analysis is based on Chinese Medicine and Applied Kinesiology and is a noninvasive way to access information about the body. Clients provide a small sample of hair (5-10 strands) which is analyzed to

identify frequencies that correspond to systemic imbalances in the body. Once identified, a proprietary remedy is developed to address the imbalance. Clients may also receive recommendations for nutritional or lifestyle modifications to facilitate sustained health and well-being.

Let Me Help You Feel Better!
